

Solid, simple and smart:
advanced reliability in compressed air

MSM 2.2-7 OIL-INJECTED SCREW COMPRESSORS

Mark MSM 2.2-7

Solid, simple and smart

The Mark MSM 2.2-7 is the ultimate workshop compressor: powerful, easy to use and always reliable. Thanks to its rotary screw technology, you get more air while enjoying lower energy costs. Better yet, you can use it all day long without cool-down periods. Of course you can tailor the MSM to your specifications and preferences. We have a 2.2 to 7.5 kW power range, both floor- and tank-mounted models, and a range of options to custom-build your MSM.

Easy to use

- Intuitive controller.
- Removable panel for easy service.

More air, lower energy costs

- Get **15% more air** using **12% less energy** compared to its predecessor.
- Enjoy continuous use without cool-down periods.

An all-in-one solution

The MSM is a complete air system in one compact unit. Even options such as an air dryer, an air receiver or an oil heater are fully integrated to help you save on floor space and operational costs.

Built to last

The MSM is built in Europe. Its automated screw air end manufacturing line prevents human error and ensures the MSM is as powerful and reliable in real life as it was designed.

The workshop compressor

Comfortably quiet

The MSM 2.2-7 was built to be installed and used right where you need it: on your shop floor. That is why we made the unit extra quiet. With a sound level as low as 61 dB(A), the MSM is comparable to a household appliance.

Cost-effective to buy and own

The MSM doesn't require a separate compressor room. That reduces logistical hassles such as piping, but also lowers your operational and your investment costs. How? The MSM does not have to push its air through an elaborate network of pipes. This means less pressure drops and a higher Free Air Delivery, which generates significant energy savings. But it often also frees up the possibility of choosing a lower pressure and power variant of the MSM, and thus to lower your investment cost significantly.

lower operational costs

Lower energy use and costs

Get a lower pressure and power variant

lower investment costs

The all-in-one compressor

Advanced screw air end

The MSM 2.2-7 comes with a new high-efficiency air end that delivers 15% more air and is 12% more efficient than its predecessor.

IE3 efficiency motor allows for continuous operation while reducing energy costs.

Refrigerant dryer can be added to your MSM for dry, quality air.

Super-silent canopy reduces sound emissions to a comfortable 61-68 dB(A).

Aside from the 200, 270 and 500-liter tank-mounted models, floor-mounted units are available in all power sizes.

Easy control

The MSM 2.2-7 comes with the ES4000 Basic controller, which offers intuitive compressor control, monitoring and safety features, including:

- **Icon-based display.**
- **Pressure and temperature readings.**
- **Remote start/stop.**
- **Automatic restart after a power failure.**
- **Maintenance service warnings.**
- **Fault management.**
- **Fast pressure setting directly on the controller.**

Enhance and customize your MSM

Thanks to its wide range of options and flexible build, the MSM 2.2-7 can accommodate all your requirements.

Line filters

Can be added for high-quality air.

No-loss timer drain

Removes tank condensate.

500-liter tank

Gives you extra air storage and reduces the risk of condensation.

Oil heater

Prevents intermittent-use condensation by maintaining a constant oil temperature while unloading/idle.

Tropical thermostat

Maintains a higher oil temperature to reduce the risk of condensation.

Unique condensate prevention

If you don't use your compressor continuously, investing in condensate prevention is a smart choice. The MSM eliminates the risk of condensation with a host of features, including an oil heater, a tropical thermostat, and a 500-liter tank.

An MSM that works for you

Do you need advanced reliability features or will a basic version suffice? These four MSM 2.2-7 configurations mix and match standard components with advanced options to give you a solution that best meets your needs.

The convincing benefits of screw technology

Are you considering a piston compressor? The rotary screw technology of the MSM 2.2-7 offers much stronger benefits. A quick comparison of performance, noise, and air quality shows the MSM to be the better workshop solution.

Stronger performance

The MSM generates more air and does so more efficiently thanks to its superior compression technology.

Longer working hours

While pistons need cool-down periods, the MSM can be used all day long.

Lower sound levels

The MSM 2.2-7 emits just 61 to 68 dB(A). Pistons are typically 20 dB(A) louder.

Cleaner air

With an oil carry-over of less than 5 ppm, the MSM generates much cleaner air than a typical piston compressor (more than 30 ppm) to protect your pneumatic tools.

Technical specifications

Model	Max. working pressure	Reference working pressure	Free Air Delivery @ reference conditions*			Motor power		Noise level **	Weight				
									Base-mounted	Tank-mounted 200L.	Tank-mounted 200L. + dryer	Tank-mounted 270L.	Tank-mounted 270L. + dryer
Bar	Bar	m ³ /h	l/min	cfm	kW	hp	db(A)						
MSM 2.2	8	7.5	22.0	366	12.9	2.2	3	61	110	165	190	180	205

CARE

Care is what service is all about: professional service by knowledgeable people, using high-quality original parts.

TRUST

Trust is earned by delivering on our promises of reliable, uninterrupted performance and long equipment lifetime.

EFFICIENCY

Equipment efficiency is ensured by regular maintenance. Efficiency of the service organization is how Original Parts and Service make the difference.
